

# BROOKER BUILDINGS

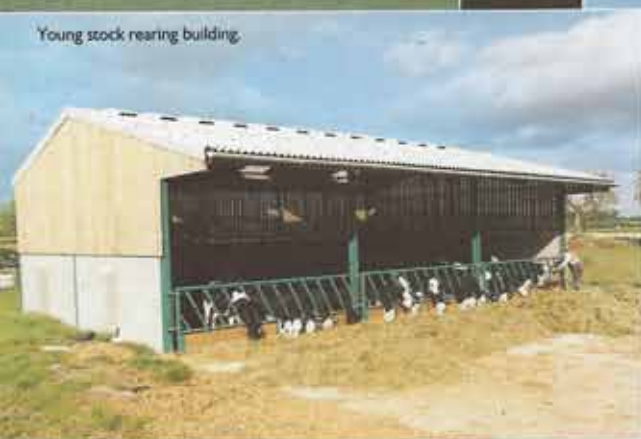

# GROWTH BUILT ON SERVICE

Formed in 1965, A.R.D. Brooker Engineering Limited has established a reputation for providing high quality steel buildings completed on time at a highly competitive price. Over the years we have built up the expertise and experience to handle all types of steel framed farm buildings. All aspects of design, fabrication, delivery and erection are the responsibility of our own fully qualified and trained staff headed by an experienced, effective and enthusiastic management team who have developed the extensive modern works incorporating our highly efficient flowline fabrication facilities. Our aim is a satisfied customer who will recommend us to others and much of our business comes in this way, both in the United Kingdom and Overseas.

General purpose building

Hay/straw, beef and grain complex.

Under floor lateral ducts.

800 tonne on floor grain store.

Pig fattening unit with slurry store

## A COMPREHENSIVE SERVICE TO AGRICULTURE

Brooker Buildings are designed, fabricated, delivered and erected by our own staff. This gives us full control over our production and erection programmes and enables us to project accurately our commencement and completion dates.

We are geared to offer a complete service from the initial design and planning stage, including application for local authority approvals, through the erection of the building itself, to the provision of storage walling, insulation, crop storage equipment and stock feeding and handling equipment. We also offer a package deal including all builder's work within an approximate 50 mile radius of Stratford-upon-Avon.

Our farm buildings are designed to B.S. 5502 by our fully qualified structural engineers and fabricated in our modern works which extends to over 50,000 sq. ft. Erection and cladding is carried out quickly and accurately by our own fully skilled teams. We also supply buildings for erection by clients when required.
