

BROOKER BUILDINGS

GROWTH BUILT ON SERVICE

Formed in 1965, A.R.D.

Brooker Engineering Limited has since established a reputation for providing high quality steel buildings completed on time at a highly competitive price. Over the years we have built up our expertise and experience to handle all types of conventional or custom designed steel framed buildings and structures. All aspects of design, fabrication, delivery and erection are the responsibility of our own fully qualified and trained staff headed by an experienced, effective and enthusiastic management team who have developed the extensive modern works incorporating our highly efficient flowline fabrication facilities. Our established reputation ensures high quality steelwork and first class service for all our clients both in the United Kingdom and Overseas.

A COMPREHENSIVE SERVICE TO THE CONSTRUCTION INDUSTRY

Brooker Buildings are designed, fabricated, delivered and erected by our own staff. This gives us full control over our production and erection programmes and enables us to project accurately our commencement and completion dates.

Design is undertaken by our fully qualified structural engineers who are always available to discuss your project and design to your requirements. Alternatively we can supply steelwork to your design and details.

Fabrication is carried out in our modern works extending to over 50,000 sq. ft., which is ideally situated for access to all parts of the country. We utilise a very efficient flowline production system incorporating modern cutting and welding equipment which provides flexibility for producing any type of steelwork quickly and accurately.

Delivery is effected by our own transport thus ensuring that materials are on site on time.

Erection is executed swiftly and precisely by our own comprehensively equipped teams. Cladding services are available when required.
